

EFC Corrosion Summer School

CHALLENGES OF CORROSION FAILURE ANALYSIS, MONITORING AND MAINTENANCE

4 - 6 SEPTEMBER 2025
STAVANGER (NORWAY)

Corrosion impacts critical infrastructures widely, necessitating innovative solutions to enhance safety, reliability, and sustainability across industries.

What to expect

- Explore this specialised summer school's vital field of corrosion failure analysis, monitoring, and maintenance.
- Learn key concepts in failure analysis and advanced monitoring techniques
- Gain valuable knowledge on methods for assessing and predicting corrosion-related failures.
- Participate in a dynamic programme featuring expert-led lectures, on-site visits, and engaging social activities to inspire collaboration and learning.

Advance your expertise and connect with peers in this specialised programme for graduate students, post-docs, and engineers

Information

Date: September 4 to 6, 2025
Location: University of Stavanger, Norway
Registration will open: Mid April 2025
